SHUBHAM ADVERTISE WEBAPP

Proposal PDF, Rate Approval and Enquiry Updates

The following changes are required in the **Sales, Proposal Builder and Enquiry modules** of the Shubham Advertise WebApp.

---

1. GENERATED PROPOSAL PDF UPDATES

1.1 Remove Client Mobile Number

The client's mobile number must not be displayed anywhere in the generated proposal PDF.

The proposal may continue to display other required client details, such as:

- Client/Company Name
- Proposal Date
- Salesperson Name, if currently included
- Other approved business details

However, the **client mobile number must be completely removed** from the proposal PDF.

1.2 Proposal Date Format

The proposal date displayed at the top of the PDF must follow the format:

DD/MM/YYYY

Example

25/06/2026

Do not use formats such as:

- 2026-06-25
- June 25, 2026
- 25 June 2026

The same date format should be followed consistently in all generated proposal PDFs.

1.3 Currency Symbol and Rate Formatting

Any incorrect, unsupported or unclear currency symbol currently appearing before the rates must be removed.

Use the standard Indian Rupee symbol:

₹

To avoid PDF font or symbol-display issues, the recommended format is:

- Mention the currency once in the column heading, such as **Final Rate Per Month (₹)**
- Keep only numeric values inside the table cells

Example

Final Rate Per Month (₹)
60,000
20,460

This will prevent an incorrect symbol from appearing repeatedly before every rate.

All monetary values should also use proper Indian number formatting wherever possible.

Examples

- ₹9,000
- ₹60,000
- ₹1,25,000

---

2. EXACT PROPOSAL TABLE STRUCTURE

The proposal PDF must contain the following columns in the same order:

1. **Sr. No.**
2. **City**
3. **Location**
4. **Media**
5. **W**
6. **H**
7. **SQFT**
8. **Type**
9. **Final Rate Per Month (₹)**
10. **Printing Charges (₹)**
11. **Mounting Charges (₹)**
12. **Available Date**

These should be the standard fields displayed for every selected hoarding in the generated proposal.

2.1 Field Explanation

Sr. No.

Display the sequence number of the selected hoarding.

City

Display the city in which the hoarding is located.

Location

Display the complete location or landmark of the hoarding.

Media

Display the media type, such as:

- Hoarding

- Gantry
- Unipole
- Other applicable media type

W

Display the width of the hoarding.

H

Display the height of the hoarding.

SQFT

Display the total square feet of the hoarding.

The system should calculate:

SQFT = Width × Height

Type

Display the hoarding type or illumination type, such as:

- NL
- Lit
- Non-Lit
- Other existing values

Final Rate Per Month

Display the final approved monthly hoarding rate offered to the client.

This must be the final rate after any bargaining, discount or approved rate change.

Printing Charges

Display the calculated printing charges for that particular hoarding.

Mounting Charges

Display the calculated mounting charges for that particular hoarding.

Available Date

Display either:

- The available date in **DD/MM/YYYY** format, or
- **Immediate**, when the hoarding is immediately available

---

3. PRINTING AND MOUNTING CHARGE CALCULATION

Printing and mounting charges must be calculated separately for every hoarding based on its total square feet.

3.1 Printing Charge Formula

Printing Charges = Total SQFT × Printing Rate Per SQFT

Example

Hoarding size:

- Width: 30 feet
- Height: 30 feet
- Total SQFT: 900
- Printing rate: ₹10 per SQFT

Calculation:

900 × ₹10 = ₹9,000

Therefore, the proposal table should display:

Printing Charges: ₹9,000

3.2 Mounting Charge Formula

Mounting Charges = Total SQFT × Mounting Rate Per SQFT

Example

- Total SQFT: 900
- Mounting rate: ₹5 per SQFT

Calculation:

900 × ₹5 = ₹4,500

Therefore, the proposal table should display:

Mounting Charges: ₹4,500

3.3 Separate Rates for Each Hoarding

Printing and mounting rates must be assigned or calculated individually for each selected hoarding.

This is required because:

- Different hoardings may have different sizes
- Printing rates may vary
- Mounting rates may vary
- Some hoardings may not require printing or mounting

If a charge is not applicable, the value should be displayed as:

₹0

3.4 Rate Input Requirements

During proposal creation, Sales should be able to enter:

- Printing Rate Per SQFT
- Mounting Rate Per SQFT

The system should automatically calculate:

- Total SQFT
- Total Printing Charges
- Total Mounting Charges

The calculated value should be displayed against each hoarding before generating the PDF.

---

4. PROPOSAL TOTAL AMOUNT SUMMARY

At the end of the proposal table, add a clear pricing summary for all selected hoardings.

The summary should include:

1. **Total Final Hoarding Rate**
2. **Total Printing Charges**
3. **Total Mounting Charges**
4. **Subtotal Before GST**
5. **GST Amount**, if applicable
6. **Grand Total**

4.1 Total Calculation

Without GST

Grand Total = Total Hoarding Rate + Total Printing Charges + Total Mounting Charges

With GST

Subtotal = Total Hoarding Rate + Total Printing Charges + Total Mounting Charges

GST = Subtotal × 18%

Grand Total = Subtotal + GST

4.2 Example

Suppose the selected proposal includes:

- Total monthly hoarding rates: ₹1,00,000
- Total printing charges: ₹20,000
- Total mounting charges: ₹10,000

Subtotal:

₹1,00,000 + ₹20,000 + ₹10,000 = ₹1,30,000

GST at 18%:

₹1,30,000 × 18% = ₹23,400

Grand Total:

₹1,30,000 + ₹23,400 = ₹1,53,400

The proposal should clearly display:

- Total Hoarding Rate: ₹1,00,000
- Total Printing Charges: ₹20,000
- Total Mounting Charges: ₹10,000
- Subtotal: ₹1,30,000
- GST @18%: ₹23,400
- **Grand Total: ₹1,53,400**

If GST is not applicable, GST should either display as **₹0** or the GST row may be hidden according to the existing proposal design.

---

5. BELOW-MINIMUM RATE APPROVAL FLOW

Currently, when a Sales user enters a rate below the minimum rate, the system displays an error and does not allow the user to continue.

This should be changed into a rate-approval workflow.

5.1 Minimum Rate Validation

When Sales enters a rate lower than the minimum rate stored for that hoarding, show a warning such as:

“The entered rate is below the minimum allowed rate. Approval is required to continue.”

The warning should clearly display:

- Standard Rate
- Minimum Rate
- Entered Rate
- Difference between Minimum Rate and Entered Rate

5.2 Request Permission Button

Add a button:

Request Rate Approval

When Sales clicks this button, open a popup asking for:

- Proposed Final Rate
- Reason for offering a rate below minimum
- Remarks
- Client Name
- Hoarding details
- Optional supporting note

5.3 Approval Request Flow

After submission:

- Send the approval request to the authorized **Owner/Manager**
- Mark the rate status as **Pending Approval**
- Notify the Sales user when the request is approved or rejected

Suggested statuses:

- Approval Not Required
- Pending Approval
- Approved
- Rejected

5.4 Proposal Generation Restriction

Until the rate request is approved:

- Sales may save the proposal as a draft
- The proposal must not be finalized, downloaded or sent to the client using the below-minimum rate

After approval:

- Allow Sales to finalize and generate the proposal PDF
- Use the approved rate as the **Final Rate Per Month**
- Store the approver's name, approval date and approved rate for future reference

If rejected:

- Sales must revise the rate or submit another approval request

---

6. NEW ENQUIRY — INTERESTED HOARDING SEARCH INTERFACE

Inside:

Sales → Create New Enquiry → Interested Hoarding

Replace the basic Interested Hoarding field with a large hoarding search and selection interface.

This should follow the hoarding search flow discussed during the meeting.

6.1 Search Interface

When the user clicks the **Interested Hoarding** field or button, open a full search interface or modal.

The Sales user should be able to search and filter hoardings using:

- Hoarding Name or Hoarding ID
- City
- Area/Zone
- Location/Landmark
- Media
- Hoarding Type
- Width

- Height
- SQFT
- Availability
- Available Date
- Facing Direction
- Position
- Illumination

The system should search the hoarding database and update the results dynamically.

6.2 Search Suggestions

Search fields such as City, Area/Zone and Location/Landmark should provide autocomplete suggestions.

Example

If the user enters:

“Ka”

The City dropdown may show:

- Kadi
- Kalol

If the user enters:

“Kri”

The Location/Landmark dropdown should show matching locations available in the database.

When the search field is clicked without typing anything, show all unique available values for that field.

6.3 Search Result Table

The search results should show enough details for Sales to identify the correct hoarding.

Recommended columns:

- Select
- Hoarding Name/ID
- City
- Area/Zone
- Location/Landmark
- Media
- Size
- SQFT
- Type
- Availability
- Available Date
- Final/Standard Rate

6.4 Hoarding Selection

Allow the Sales user to select:

- One hoarding, or
- Multiple hoardings

After selection, add the selected hoardings to the enquiry.

The selected hoardings should be visible inside the enquiry before saving.

Sales should also be able to remove an incorrectly selected hoarding before submitting the enquiry.

6.5 Store Enquiry-Hoarding Relationship

When the enquiry is saved, store the selected hoarding IDs against that enquiry.

This is required so the team can later check:

- Which hoardings the client was interested in
- Whether those hoardings were booked
- Whether similar hoardings can be offered later
- Which clients should be approached when those hoardings become available again

The relationship must be stored using the actual hoarding records or IDs, not only as plain text.

---

7. FINAL EXPECTED PROPOSAL PDF LAYOUT

The proposal PDF should contain:

Proposal Header

- Company details/logo
- Client/Company Name
- Proposal Date in **DD/MM/YYYY**
- Client mobile number must not be shown

Hoarding Table

- Sr. No.
- City
- Location
- Media
- W
- H
- SQFT
- Type
- Final Rate Per Month
- Printing Charges
- Mounting Charges
- Available Date

Pricing Summary

- Total Hoarding Rate
- Total Printing Charges
- Total Mounting Charges
- Subtotal
- GST, if applicable
- Grand Total

Disclaimer

Continue displaying the existing proposal disclaimer:

“The proposed hoardings are subject to availability.”

---

8. FINAL ACCEPTANCE CHECKLIST

The update will be considered complete when:

- Client mobile number is removed from the proposal PDF
- Proposal date displays in DD/MM/YYYY format
- Standard ₹ formatting is used without broken or unsupported symbols
- The proposal contains all required columns from the reference layout
- A separate Mounting Charges column is added
- Printing and mounting charges calculate automatically using SQFT
- Proposal displays the final total of all selected hoardings and charges
- Sales can request approval for below-minimum rates
- Below-minimum proposals cannot be finalized without approval
- Interested Hoarding in New Enquiry opens a complete search interface
- Search supports City, Area/Zone, Landmark and other hoarding filters
- One or multiple interested hoardings can be linked with an enquiry
- Selected hoarding IDs are stored against the enquiry for future follow-up
